Cost Control thru Collaboration

## Cloud Software & Services for Architectural / Construction Cost Engineering

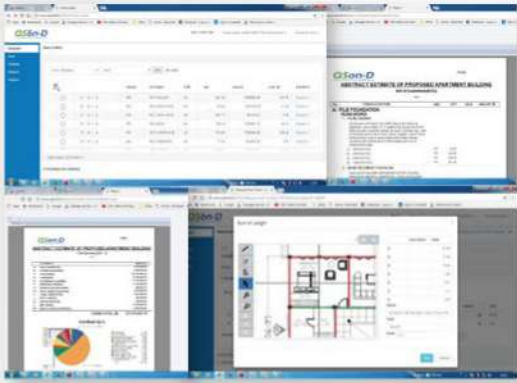

## What is Cloud Quantity Surveying?

Cloud Quantity Surveying services are internet based services, where users can subscribe to the various modules of the quantity surveying and cost engineering software, or receive cost engineering services for various stages of their Architectural construction project.

## Why Cloud?

- No upfront Technology investments
- No Software purchases
- Subscribe & start working straightaway
- Affordable Pay per use rates
- Unlimited Data Storage & Easy retrievals
- Multi user, Multi location Collaboration
- Standardization helps coordinated teamwork
- Adapt or reuse project Data for new projects
- On-screen Digital takeoff
- CAD software not needed
- Error Detection & Editing Easier
- Scalable as company grows
- Dedicated Online support
- Automatic System upgrades
- Green: Reduces Paper wastage
- Invoke external experts

# Products

## 1 CloudBoQ

Architectural Costing Online  
India's first 100% SaaS Cloud estimator

CloudBoQ is a SaaS (Software as a Service) for Architectural Estimating and BoQ production. The software is accessed by users via an internet browser on a monthly subscription basis, and is centrally hosted.

## 2 QS on-demand Prime

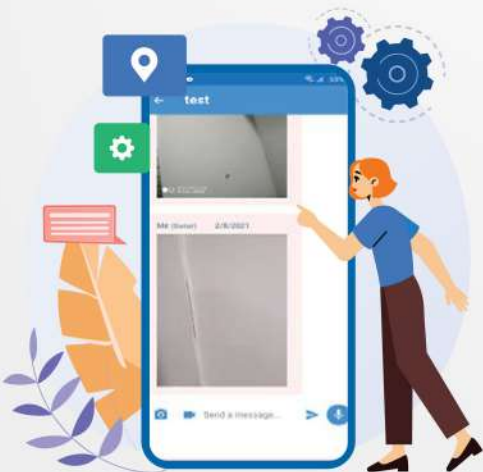

In QSon-Demand "Managed Services," the user and their collaborators subscribe to the technology platform, and are trained in the domain content required to use the specific software module related to the cost management of the ongoing project life cycle stage; under the provider's mentorship and guidance. Subscribers can also avail outsourcing or advisory services through designated experts assigned.

## 3 VQtrak

### Site progress tracker

VQtrak is a Managed service, linked to a mobile based app which allows Architects / Contractors / Project Managers to receive images / Videos / Audio from their representatives in various multiple site locations and documentarily communicate instructions and suggestions on quality aspects or progress of various work activities remotely.

# Services

- Free/Pay per use Estimation Software on Internet
- Outsourcing / Advisory / Peer Reviews by experts
- Pre-Post Contract Cost Monitoring & Advisory
- Corporate Managed Services
- Customised Solutions

## Project Lifecycle Stage Services

### ① Pre Contract

- **Feasibility Stage**
  - Rough Cost Budgeting
  - Feasibility & Profitability Analysis
- **Design Development Stage**
  - Rough Study Estimates
  - Super built up Area Calculations
- **Detailed Design Stage**
  - Detailed BoQ & Project Estimates
  - Rate Analysis & item of work pricing
  - Rebar Quantification & Intensity Analysis

### ② Post Contract

- **Construction Stage**
  - Billing & Bill Measurement Recording
  - Interim & Post completion Bill Audit
  - Cost Variance Tracking
  - To/Till Complete Cost Analysis
  - Resource reconciliation studies
  - Bar bending schedule (BBS)
- **Visual Audit using mobile app**
  - Post/Mid Project Visual Quality Audit
  - Construction Progress Quantity, Quality and schedule tracker

## Who can benefit?

- Architects, Designers & Engineers
- Project Management Consultants
- Quantity Surveyors & Cost Engineers
- Construction & Interior Contractors
- Site Managers & Construction Engineers
- Government & Financial Agencies
- Corporate owners, Builders
- Self Home builders
- Students of Architecture & Engineering
